SL_ID	Reg_no	lectureID	participationStatus

Student_quiz

SQ_ID	Reg_no	quizID	score

Instructor_notification

IN_ID	instructorID	Notif_ID

Data dictionary

User (stores all users of the system)

SN	Field name	datatype	Field size	constraint	source	description	example
1	userID	integer	unlimited	Primary key	-	The unique identifier for each user of the system	1002
2	username	string	30	Not null	-	The user name of the system user	T/UDOM/2020/00789, thewinner016@gmail.com
4	phoneno	string	15		-	The mobile phone number of the user	+255755189736
5	password	string	255	Not null	-	The encrypted login password of the user	x@wwxx-\3411\\\||#####
Note: add all other fields required by the framework							

Instructor (stores all instructors)

SN	Field name	datatype	Field size	constraint	source	description	example
1	instructorID	integer	unlimited	Primary key	-	The unique identifier for each instructor	1007
2	userID	integer	-	Foreign key	user	The user identification number of an instructor	0089
3	DepartmentID	integer	-	Foreign key	department	The college department identifier in which the instructor belongs	2
4	Full_name	string	30	Not null	-	The instructor's full name	Dr. khalidi hassan
5	gender	string	7	Not null	-	The instructor's gender	male
6	PP	string	10	-	-	The instructor's optional profile picture	Pic/Thewinner.jpg

Course (stores all courses)

SN	Field name	datatype	Field size	constraint	source	description	example
1	Course_code	string	7	Primary key	-	The code that uniquely identifies each course in a department	CP123
2	courseName	string	150	Not null	-	The course name of each course in a department	Introduction to high level programming
3	Course_credit	integer	-	Not null	-	The total credits for each course	10
4	Course_semester	integer	-	Not null	-	the academic semester in which the course is active	2
5	Course_duration	integer	-	-	-	The total number of hours allocated for each course until it finishes	42
6	Course_status	string	10	-	-	The status of the course whether it is ongoing or finished	ongoing

Student (stores all students)

SN	Field name	datatype	Field size	constraint	source	description	example
1	Reg_no	string	20	Primary key	-	The student's registration number that uniquely identifies them	T/UDOM/2020/00920
2	userID	integer	-	Foreign key	user	The user unique identification number for each student	50089
3	programCode	string	10	Foreign key	program	The code that uniquely identifies the program in which the student is enrolled in	BSC CIS3
4	fname	String	10	Not null	-	The student's registered first name	khalid
5	midname	string	10	Not null	-	The student's registered middle name or initial	Hassan/ h.
6	lname	string	10	Not null	-	The student's registered last name	hassan
7	gender	string	7	Not null	-	The student's gender	male
8	F4_index_no	string	20	-	-	The student's optional form four index number	S003/2000/2005
9	YOS	integer	-	Not null	-	The student's year of study	3
10	DOR	date	-	Not null	-	The date on which the student has been registered on this platform	1/7/2022
11	status	string	10	Not null	-	The student's current status whether he has postponed, discontinued, or active	active

College (stores all colleges)

SN	Field name	datatype	Field size	constraint	source	description	example
1	CollegeID	integer	-	Primary key	-	The unique identifier for each college	7
2	College_name	string	50	Not null	-	The college name for each college	College of informatics and virtual education
3	College_abbrev	string	10	-	-	The college's official abbreviation	CIVE

Department (stores all departments of the college)

SN	Field name	datatype	Field size	constraint	source	description	example
1	departmentID	integer	-	Primary key	-	The unique identifier for each department in a college	4
2	CollegeID	integer	-	Foreign key	college	The college identifier in which the department belongs	7
3	Department_name	string	100	Not null	-	The department name for each department	Department of computer science and engineering
4	Depart_abbrev	string	10	-	-	The department's name abbreviation	DoCSE

Program (stores all programs of the department)

SN	Field name	datatype	Field size	constraint	source	description	example
1	programCode	string	10	Primary key	-	The unique identification code for each program in a department or college	BSC CIS3
2	departmentID	integer	-	Foreign key	department	The department identifier in which the program belongs	6
3	Prog_name	String	100	Not null	-	The program name for each program in a department	Bachelor of science in computer science
4	Prog_duration	integer	-	Not null	-	Duration in number of years for a program to finish or for one to graduate	4
5	capacity	integer	-	-	-	The capacity in number of students that can be enrolled in a program for a single academic year	900

Groups (stores all student groups)

SN	Field name	datatype	Field size	constraint	source	description	example
1	groupID	int	-	Primary key	-	The unique identifier for each student's group	809
2	groupName	string	10	Not null	-	The group name for each existing group	Group 1
3	course_code	string	7	Foreign key	course	The course's unique identifier of the course in which the group has been created	CP123
4	Reg_no	string	20	Foreign key	student	The registration number of the student who created the group	T/UDOM/2020/00978
5	instructorID	int	-	Foreign key	instructor	The unique identifier of the instructor who created the group	3304
6	Creator_type	string	10	Not null	-	The creator type of the group whether it's an instructor or a student	instructor
7	Created_date	date	-	Not null	-	The date on which the group has been created	2/4/2021
8	Created_time	time	-	Not null	-	The time at which the group has been created	12:00:00

Thread (stores all threads of the forum)

SN	Field name	datatype	Field size	constraint	source	description	example
1	threadID	integer	-	Primary key	-	The unique identifier of each thread in a forum	100045
2	Reg_no	string	20	Foreign key	student	The registration number of the student who started the thread in the forum	T/UDOM/2020/00900
3	instructorID	integer	-	Foreign key	instructor	the unique identifier of the instructor who started the thread	5567
4	Starter_type	string	10	Not null	-	The type of the starter of the thread whether it is an instructor or student	instructor

Rep_thread (stores all reply threads of the forum)

SN	Field name	datatype	Field size	constraint	source	description	example
1	repID	integer	-	Primary key	-	The unique identifier of thread replies in the forum	9000
2	threadID	integer	-	Foreign key	thread	The thread unique identifier of a reply thread. A reply thread becomes a main thread too and should also take a main thread identifier	7890
3	Parent_thread	integer	-	Foreign key	thread	The unique identifier of the main thread for which this reply is.	7589
4	content	string	500	Not null	-	The textual content of the reply	The solution for your problem is not related to the course
5	repdate	date	-	Not null	-	The date on which this reply has been made	2/11/2021
6	reptime	time	-	Not null	-	The time at which this reply has been made	20:00:00

Fresh_thread (stores all new threads of the forum)

SN	Field name	datatype	Field size	constraint	source	description	example
1	freshID	integer	-	Primary key	-	The unique identifier of the fresh/new thread in the forum	1002
2	threadID	integer	-	Foreign key	thread	The thread identifier of this fresh thread in the thread table	1003
3	threadTitle	string	200	Not null	-	The title of the fresh thread	Programming for old people
4	Thread_desc	string	1000	Not null	-	The textual description of the thread or the content of the thread	Should old people involve themselves In any programming?
5	Thread_date	date	-	Not null	-	The date on which this thread has been created	2/3/2022
6	Thread_time	time	-	Not null	-	The time at which this thread has been created	20:00:00

Assignment (stores all assignments)

SN	Field name	datatype	Field size	constraint	source	description	example
1	assID	integer	-	Primary key	-	The unique identifier of each assignment	1004
2	instructorID	integer	-	Foreign key	instructor	The identifier of the instructor who created this assignment	302
3	course_code	string	7	Foreign key	course	The course code for the course for which this assignment has been created	Cp123
4	assName	string	10	Not null	-	The name or title of the assignment	Assignment 1 or lab 1 or programming assignment…
5	assType	string	10	Not null	-	The type of the assignment whether it is an individual or group assignment	individual
	assNature	string	10	Not null	-	The nature of the assignment whether it is a lab assignment , assignment etc	lab
6	Ass_desc	string	1000	-	-	A textual description of the given assignment or assignment question	Write a program to delete a file in a computer
7	submitMode	string	10	Not null	-	The submission mode of the assignment whether it is a single submission or accepts resubmission	Single submission
8	startDate	datetime	-	Not null	-	The starting date and time of the assignment	22/5/2022
9	finishDate	datetime	-	Not null	-	The ending date of the assignment	23/5/2022
10	Total_marks	integer		Not null	-	The total marks for the assignment	40
11	FileName	string	20	-	-	The file name of the attached assignment file if any	Ass1.pdf

Material (stores all class materials)

SN	Field name	datatype	Field size	constraint	source	description	example
1	Material_ID	integer	-	Primary key	-	The unique identifier of material files	2900
2	instructorID	integer	-	Foreign key	instructor	The unique identifier of the instructor who uploaded the material	1008
3	Course_code	string	7	Foreign key	course	The course code for which the material has been uploaded	Cp123
4	title	string	100	Not null	-	The title of the material	Programming for dummies, lecture 3
	Material_type	string	15	Not null	-	The type of the material whether it is a tutorial, video, book, research paper,…	book
5	Upload_date	date	-	Not null	-	The date on which the material has been uploaded	3/5/2020
6	Upload_time	time	-	Not null	-	The time at which the material has been uploaded	22:00:00
7	fileName	string	20	Not null	-	The name of the uploaded file	Lecture1.pptx

Announcement (stores all announcements)

SN	Field name	datatype	Field size	constraint	source	description	example
1	annID	integer	-	Primary key	-	The unique identifier for each announcement	121
2	instructorID	integer	-	Foreign key	instructor	The identifier of the instructor providing this announcement	300
3	course_code	string	7	Foreign key	course	The course code of the course to which this announcement is dedicated	Cp213
4	content	string	255	Not null	-	The textual content of the announcement	
5	Ann_date	date	-	Not null	-	The date on which the announcement was posted	22/2/2021
6	Ann_time	time	-	Not null	-	The time at which the announcement was posted	22:00:00

Notification (stores all notifications)

SN	Field name	datatype	Field size	constraint	source	description	example
1	Notif_ID	integer	-	Primary key	-	The unique identifier of each notification	122
2	Course_Code	string	7	Foreign key	course	The course code of the course whose students this notification is dedicated to	Cp213
3	title	string	20	Not null	-	The title of the notification	Assignment marked
4	content	string	100	Not null	-	The content of the notification	Your assignment has been marked see your score
5	Notif_date	date	-	Not null	-	The date on which the notification was sent	22/3/2021
6	Notif_time	time	-	Not null	-	The time at which the notification was sent	10:00:00

Live_lecture (stores all live lectures)

SN	Field name	datatype	Field size	constraint	source	description	example
1	lectureID	intege	-	Primary key	-	The unique identifier for each lecture	123
2	instructorID	integer	-	Foreign key	instructor	The identifier of the instructor who created this lecture	1233
3	Course_Code	string	7	Foreign key	course	The course code of the course for which this lecture has been created	Cp300
4	title	string	200	Not null	-	The title or subject of the lecture	Arrays initialization in c++
5	date	date	-	Not null	-	The specified date on which this lecture will be conducted	22/1/2021
6	startTime	time	-	Not null	-	The time at which the lecture starts	10:00:00
7	endTime	time	-	Not null	-	The time at which the lecture will end	12:00:00
8	lateEntryMaxTime	integer	-	-	-	The maximum duration in minutes after which there is no more entries in the lecture	15
9	status	string	10	Not null	-	The current status of the lecture whether it is upcoming, ongoing, finished, postponed or cancelled	upcoming

Quiz (stores all quizzes)

SN	Field name	datatype	Field size	constraint	source	description	example
1	quizID	integer	-	Primary key	-	The unique identifier of the quiz	233
2	lectureID	integer	-	Foreign key	Live_lecture	The identifier of the lecture for which this quiz wa created	34
3	Total_marks	integer	-	Not null	-	The total marks for the quiz	50
4	duration	integer	-	Not null	-	The duration in minutes for the quiz	120
5	quiz_file	string	15	Not null	-	The quiz file name	Quiz1.html
6	status	string	10	Not null	-	The quiz current status whether is finished, ongoing, upcoming	finished

Ext_assess (stores all external assessments)

SN	Field name	datatype	Field size	constraint	source	description	example
1	assessID	integer	-	Primary key	-	The unique identifier of the external assessment	345
2	instructorID	integer	-	Foreign key	instructor	The identifier of the instructor who uploaded the assessment	234
3	Reg_no	string	20	Foreign key	-	The identifier of the student associated with this external assessment record	T/UDOM/2020/20390
4	Course_code	string	7	Foreign key	course	The course code of the course for which this assessment has been uploaded	Cp213
5	title	string	20	Not null	-	The title or name of the assessment being uploaded	Lab assessment, test one
6	Total_marks	integer	-	Not null	-	The total marks allocated for this assessment	50
7	score	Floating number	5	Not null	-	The student individual score of this assessment	40

Logs (stores all logs of the system)

SN	Field name	datatype	Field size	constraint	source	description	example
1	logID	integer	-	Primary key	-	The unique identifier of each log record	34
2	userID	integer	-	Foreign key	user	The identifier of the user associated with this log record	345
3	object	string	10	Not null	-	The object of the system affect by the user activity	material
4	activity	string	15	Not null	-	The activity type performed by the user on the system objects: delete, update,	delete
5	logdate	date	-	Not null	-	The date on which the activity was performed	22/01/2021
6	logtime	time	-	Not null	-	The time at which the activity was performed	22:00:00

Admin (stores all administrators of the system)

SN	Field name	datatype	Field size	constraint	source	description	example
1	adminID	integer	-	Primary key	-	The unique identifier for each admin	123
2	userID	Integer	-	Foreign key	user	The user identifier of the admin of the system	344
3	collegeID	integer	-	Foreign key	college	The college identifier to which the admin is assigned to	7

Submit (stores all student assignment submits)

SN	Field name	datatype	Field size	constraint	source	description	example
1	submitID	integer	-	Primary key	-	The unique identifier of each student submit	123
2	Reg_no	string	20	Foreign key	student	The registration number of the student who submitted this	T/UDOM/2020/20342
3	assID	integer	-	Foreign key	assignment	The assignment identifier of the assignment for which the student has submitted for	234
4	FileName	string	20	Not null	-	The file name of the file associated with this submit	Assignment1.pdf
5	score	Floating number	5	-	-	The student's score result for this assignment submit	30.5
6	Submit_date	date	-	Not null	-	The date on which the student submitted this	22/1/2022
7	Submit_time	time	-	Not null	-	The time at which the student submitted this	23:00:00
8	comment	string	200	-	-	The comment provided by the instructor after marking this submit	I wonder the reason why you easily fail a takeaway assignment.

Q_marks (stores marks of each assignment question)

SN	Field name	datatype	Field size	constraint	source	description	example
1	qmarkID	integer	-	Primary key	-	The unique identifier for each question marks record	245
2	submitID	integer	-	Foreign key	submit	The identifier of the submit to which this mark belongs	233
3	Assq_ID	integer	-	Foreign key	assq	The identifier of the assignment question for which this mark is given	12
4	Q_score	Floating number	5	-	-	The score given for this question	20
5	comment	string	200	-	-	The comment given by the instructor after marking this question	You should not be that stupid dividing a number by 0

Assq (stores all assignment questions)

SN	Field name	datatype	Field size	constraint	source	description	example
1	Assq_ID	integer	-	Primary key	-	The unique identifier for the question	122
2	assID	integer	-	Foreign key	assignment	The identifier of the assignment to which the question belongs	234
3	qno	integer	-	Not null	-	The question number in the assignment	3
4	Total_marks	integer	-	Not null	-	The total marks for each question in the assignment	40

Instructor_course (stores all instructor courses)

SN	Field name	datatype	Field size	constraint	source	description	example
1	IC_ID	integer	-	Primary key	-	The unique identifier of each record	2344
2	Course_code	string	7	Foreign key	course	The course code of the course to which the instructor is assigned	Cp800
3	instructorID	integer	-	Foreign key	instructor	The instructor identifier of the instructor who is assigned to the course	122

Program_course (stores all program courses)

SN	Field name	datatype	Field size	constraint	source	description	example
1	PC_ID	integer	-	Primary key	-	The unique identifier of each record	900
2	Course_code	string	7	Foreign key	course	The course code of the course that is assigned to the program	Cp700
3	programCode	string	10	Foreign key	program	The program code of the program to which the course belongs	DM1700

Student_course (stores all student courses)

SN	Field name	datatype	Field size	constraint	source	description	example
1	SC_ID	integer	-	Primary key	-	The unique identifier of each record	123
2	Reg_no	String	20	Foreign key	student	The registration number of the student assigned to the course	T/UDOM/2019/20304
3	Course_code	string	7	Foreign key	course	The course code of the course to which the student is assigned	Cp890

Group_assignment (stores all group assignments)

SN	Field name	datatype	Field size	constraint	source	description	example
1	GA_ID	integer	-	Primary key	-	The unique identifier of each record	234
2	groupID	integer	-	Foreign key	group	The identifier of the group to which the assignment has been assigned to	345
3	assID	integer	-	Foreign key	assignment	The identifier of the assignment that has been assigned to the group	34

Student_group (stores all students group members)

SN	Field name	datatype	Field size	constraint	source	description	example
1	SG_ID	integer	-	Primary key	-	The unique identifier of each record	123
2	Reg_no	String	20	Foreign key	student	The registration number of the student assigned to the group	T/UDOM/2020/00300
3	groupID	integer	-	Foreign key	group	The identifier of the group to which the student has been assigned	123

Chat (stores all chats between a student and an instructor)

SN	Field name	datatype	Field size	constraint	source	description	example
1	chatID	integer	-	Primary key	-	The unique identifier of each chat record	123
2	Reg_no	string	20	Foreign key	student	The registration number of the student who has sent or received a message	T/UDOM/2021/20154
3	instructorID	integer	-	Foreign key	instructor	The identifier of the instructor who has sent or received a message	678
4	chatText	string	500	Not null	-	The textual message sent or received by the parties	Did you submit the assignment or should I put there 0?
5	chatDate	date	-	Not null	-	The date on which the message has been sent	22/01/1970
6	chatTime	time	-	Not null		The time at which the message was sent	20:00:00
7	status	string	10	Not null	-	The current status of the message whether it is sent, delivered/seen, deleted,	delivered

Student_notification (stores all student notifications)

SN	Field name	datatype	Field size	constraint	source	description	example
1	SN_ID	integer	-	Primary key	-	The unique identifier of each record	123
2	Reg_no	String	20	Foreign key	student	The registration number of the student to which the notification is dedicated	789
3	Notif_ID	integer	-	Foreign key	notification	The identifier of the notification that's sent to the student	2

Student_lecture (stores all student attended live lectures)

SN	Field name	datatype	Field size	constraint	source	description	example
1	SL_ID	integer	-	Primary key	-	The unique identifier of each record	23
2	Reg_no	string	20	Foreign key	student	The registration number of the student who participated in the lecture	T/UDOM/2020/60004
3	lectureID	int	-	Foreign key	Live_lecture	The identifier of the lecture in which the student participated	123
4	participationStatus	string	10	Not null	-	The student's lecture participating status whether is partial, full	full

Student_quiz (stores all student quizzes)

SN	Field name	datatype	Field size	constraint	source	description	example
1	SQ_ID	integer	-	Primary key	-	The unique identifier of each record	123
2	Reg_no	String	20	Foreign key	student	The registration number of the student who has done the quiz	T/UDOM/2020/00908
3	quizID	integer	-	Foreign key	quiz	The identifier of the quiz that a student did	123
4	score	Floating number	3	-	-	The score of the student for the quiz	50.2

Instructor_notification (stores all instructor notifications)

SN	Field name	datatype	Field size	constraint	source	description	example
1	IN_ID	integer	-	Primary key	-	The unique identifier of each record	123
2	instructorID	integer	-	Foreign key	instructor	The instructor identifier to whom the notification Is sent	123
3	Notif_ID	integer	-	Foreign key	notification	The identifier of the notification that has been sent to the instructor	234

Database implementation (MYSQL, engine InnoDB)

```
create table user
(
 userID int primary key auto_increment,
